

CONNECTING CONNECTICUT:

Cable's Impact on
the State's Economy

This report was prepared by the University of
Massachusetts Donahue Institute, the public service,
outreach and economic development unit of the
University of Massachusetts Office of the President.

Published September 2011

The New England Cable & Telecommunications Association, Inc. (NECTA) is a six-state regional trade association representing cable telecommunications companies in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. NECTA retained the UMass Donahue Institute to conduct research, document the nature and scale of NECTA companies in each of the six New England states and analyze the contributions generated by its firms. NECTA represents the vast majority of cable companies in New England but is not representative of the entire industry. For this report, data were collected from various secondary sources as well as major NECTA member companies. Major NECTA member cable companies operating in Connecticut include Cablevision, Charter Communications, Comcast and Cox Communications.

PARTICIPATING NECTA MEMBER COMPANIES:

Bee Line Cable

OTHER NECTA MEMBERS:

Lincolnville Communications (Maine)
 MetroCast Communications
 NEPSK Inc./Polaris Cable Services (Maine)
 Ski Sat (New Hampshire)
 TDS Telecom (New Hampshire)
 Trans Video, Inc. (Vermont)
 Waitsfield Cable (Vermont)
 White Mountain Cablevision (New Hampshire)

SUMMARY OF KEY FINDINGS

Connecticut's cable companies contribute significantly to the state economy and to local communities. In 2010, cable's capital investment in network infrastructure and operating and payroll expenses resulted in a total contribution of \$1.47 billion in economic activity across the state. Further, between 2006 and 2010, when the state's overall economy slowed, Connecticut's major cable companies added employees. Strong capital investments, growth in consumer demand for broadband, as well as diversified and emergent cable products and services have enabled this expansion. Finally, Connecticut's cable companies also impact the communities they serve through philanthropic initiatives and by donating services to a wide variety of community institutions.

Building the foundation for economic growth

- Connecticut's cable companies are significant broadband providers within the state, contributing nearly 60 percent of all wired high-speed lines.
- Since 2005, high-speed cable broadband lines in Connecticut have increased more than 66 percent, from 404,000 to 672,000 in 2010.
- From 2006 to 2010, Connecticut's major cable companies spent more than \$928 million on capital improvements, \$165 million in 2010 alone, including investments in the network, head ends, customer premise equipment and vehicles. As of 2010, these investments helped support and create nearly 26,000 miles of broadband plant and almost 6,000 fiber strand miles across Connecticut.

Bolstering the regional economy

- During a period when the overall economy slowed, the state's major cable companies grew employment by more than 30 percent, from 2,495 employees in 2006 to nearly 3,300 in 2010. During this same period, Connecticut's overall employment decreased by 4.3 percent, and the nation's employment declined by 4.6 percent.

Change in Total Employment, 2006–2010

Source: United States Department of Labor, Bureau of Labor Statistics, Current Employment Statistics & Connecticut Department of Labor; Data collected from major NECTA firms

- Along with their own employment, major Connecticut cable companies support 6,700 jobs, including more than 3,400 positions in other industries throughout the state.

- In 2010, spending by Connecticut's major cable companies and their employees generated \$1.47 billion in economic activity across the state. Direct spending by major cable companies (capital investment, operations and employee compensation) accounted for \$851.2 million of that total, and that direct spending catalyzed an additional \$620.7 million in spending by other industries throughout the state.
- Along with spending within the telecommunications industry, major cable companies in Connecticut support a variety of important regional sectors, including cable programming; advertising and related services; and professional, scientific and technical services.
- In 2010, Connecticut's major cable companies contributed \$140.9 million in state and local taxes and fees.

Supporting local communities

- Connecticut's major cable companies annually donate cable and broadband services worth \$2 million to nearly 1,700 schools, libraries, nonprofits, government facilities and other community institutions in their service areas.
- Additionally, in 2010 alone, Connecticut's major cable companies contributed more than \$4.2 million in cash and other in-kind support to nonprofit organizations in their local communities.

Total Economic Contributions of Major Cable Companies in Connecticut, 2010

Direct Spending	Additional Indirect Contributions	Total Economic Contributions
\$851.2M	\$620.7M	\$1.47B

INTRODUCTION

Connecticut's cable companies provide the foundation for economic growth in an increasingly sophisticated economy. Connecting nearly one million residential and business subscribers, major cable companies¹ in Connecticut are expanding technologies to provide a diverse range of video, data and voice communication products and services. Through investments in an increasingly expansive communications network, cable companies play a major role in growing broadband connectivity throughout the state. Major investment in the communications backbone is accompanied by ongoing investment in human capital to support the operations of the sector.

Day-to-day operations and capital investment activities have a major effect on the Connecticut economy, contributing \$1.47 billion to the state's economy in 2010. In that same year, major cable companies employed close to 3,300 workers across Connecticut and, in the last five years, their employment numbers grew significantly despite a struggling state and national economy. While making significant economic contributions, cable companies also provide ongoing service and charitable contributions to community institutions, promoting better access to broadband and other technologies. Through their uniquely extensive and advanced broadband infrastructure, and as providers of essential communications technologies, Connecticut's cable companies are indeed at the cutting edge, driving economic growth throughout the region.

BUILDING THE FOUNDATION FOR ECONOMIC GROWTH

Connecticut relies on cable to connect

Broadband has revolutionized the way people live and work in New England, and cable companies in Connecticut are significant players in providing this crucial infrastructure to the state's economy. In response to consumer demand, the number of all high-speed Internet lines in Connecticut (including cable, DSL, mobile and FTTH) has grown explosively over the past decade, with year-over-year growth in the double digits. In 2009, there were more than 1.7 million high-speed lines, nearly 40 percent of which were cable. When considering high-speed lines supplied by strictly wired providers (without mobile), the cable sector makes up nearly 60 percent of the total.² High-speed cable broadband lines alone have increased more than 66 percent in the state since 2005, from 404,000 to 672,000 in 2010.

FIGURE 1
Growth in High-Speed Cable Broadband Lines in Connecticut, 2005–2010

Source: Federal Communications Commission, *Internet Access Services Status as of June 30, 2010*, Table 22, <http://www.fcc.gov/wcb/iatd/comp.html>

Investing in the region's broadband infrastructure

In response to increasing consumer demand for broadband capacity, the cable sector has been investing in critical communications infrastructure throughout the region. From 2006 to 2010, major cable companies in Connecticut invested \$928.7 million in capital improvements, \$165 million in 2010 alone, including investments in the network, head ends, customer premise equipment and vehicles. Investments accelerated through 2008 and 2009. As of 2010, these investments helped support and create nearly 26,000 miles of broadband plant and almost 6,000 fiber strand miles across Connecticut.

FIGURE 2
Capital Investment in Connecticut by
Major Cable Companies, 2006–2010

Source: Data from major NECTA firms; adjusted to 2010 dollars by UMDI

Cable supports the Connecticut IT industry

With \$929 million in capital spending over the last five years, Connecticut's major cable companies depend heavily on other information technology firms within the state to support the infrastructure so integral to their industry and the economy. Analysis of capital investment spending shows that cable companies invest heavily in all other information technology sectors. Capital spending is particularly focused on IT firms for communications, computer and plant hardware, and equipment. Major Connecticut cable companies also spend significantly on communications infrastructure firms within the network communications sector that help build and maintain the broadband network and provide service to customers.

BRIDGING THE DIGITAL DIVIDE: PROMOTING BROADBAND ADOPTION IN CONNECTICUT

Broadband subscribership in Connecticut is above the national average

With significant growth in broadband infrastructure, Connecticut households boast high levels of broadband subscribership. In Connecticut in

FIGURE 4
Residential Broadband Connections per Household, 2009

Source: Federal Communications Commission, *Internet Access Services: Status as of 12/31/2009*, Table 16, <http://www.fcc.gov/wcb/iatd/comp.html>

2009, there were more than one million high speed lines serving residential customers—about 0.75 high-speed broadband connections for every household in the state, compared to 0.63 in the nation overall.⁴

Promoting adoption of broadband in low-income communities in Connecticut

Despite high levels of subscribership and the continuous development of the extensive broadband infrastructure by Connecticut's cable companies and their competitors, the adoption of broadband remains an important public policy and economic development goal. National policy focus has been given to ensuring that all residents are able to access the economic and social benefits of broadband connectivity, particularly underserved groups like the economically disadvantaged and the elderly. In service of this broader effort, in April 2010, Connecticut companies Cablevision, Charter, Comcast and Cox joined other national cable providers as part of **One Economy's⁵ Digital Adoption Coalition**. The coalition is a public-private collaborative effort to bring broadband to low-income families across the United States. As the largest provider in New England, Comcast already supports several sustainable adoption programs. In Hartford, Connecticut, the **Comcast Digital Connectors Program** provides digital literacy training to high school students, who in turn train others in their communities. Additionally, Comcast has established **Internet EssentialsSM from Comcast** to boost the number of low-income students using broadband in Comcast service areas. This national program will work with local school districts to offer low-income families high-speed Internet service for \$9.95 per month, computer equipment for less than \$150 and access to basic digital literacy training.

BOLSTERING THE REGIONAL ECONOMY

Cable is creating jobs

Cable companies compete as a part of a larger telecommunications industry, which includes firms that provide cable, wireline telephone and satellite distribution of voice, data, text, sound and video. In 2009, there were more than 9,500 Connecticut workers in the larger wired telecommunications industry and, significantly, nearly 40 percent were employed by Connecticut's major cable companies.

During a period when Connecticut's overall economy experienced a slowdown, employment by major cable companies within the state grew more than 30 percent, from 2,495 employees in 2006 to nearly 3,300 in 2010. During this same period, the state and the nation overall endured substantial employment losses (–4.3 and –4.6 percent, respectively). Strong capital investments, growth in consumer demand for broadband, and diversified and emergent cable products and services, including a growing business market, have enabled cable companies to expand.

FIGURE 5
Change in Total Employment, 2006–2010

Source: United States Department of Labor, Bureau of Labor Statistics, *Current Employment Statistics* & Connecticut Department of Labor; data collected from major NECTA firms

Cable has a measurable impact

The cable sector contributes to the regional economy both directly and indirectly: through their spending on goods and services and ongoing capital investments; by hiring and paying thousands of employees; and through multiple forms of compensation to state and local governments. The value of major cable companies to the Connecticut economy is illustrated by examining these key areas of spending and estimating their effects.

Total economic contributions

Major cable companies have an impressive impact on Connecticut. Through their spending on everyday operations, capital investments and the household spending of their employees combined, these companies contributed \$1.47 billion in 2010 in economic activity across the state. Additionally, major Connecticut cable companies reported fees and taxes to state and local governments of \$140.9 million. Along with their own employment, major cable companies support more than 6,700 jobs, including more than 3,400 in industries throughout the region.

FIGURE 6
Economic Contributions of Major Cable Companies in Connecticut, 2010

	Direct Spending	Additional Indirect Contributions	Total Economic Contributions
Operations and capital investments	\$603.6M	\$448.8M	\$1.05B
Employee compensation	\$247.7M	\$171.9M	\$419.6M
Total	\$851.2M	\$620.7M	\$1.47B
State and Local Taxes and Fees*	\$140.9M

FIGURE 7
Employment Contributions of Major Cable Companies in Connecticut, 2010

Source: Data collected from major NECTA firms, calculations by UMDI; MIG, Inc., IMPLAN System

Major areas of spending

Spending to Connecticut firms

In 2010, major Connecticut cable companies spent \$603.6 million on day-to-day operations and investing in telecommunications infrastructure projects across Connecticut. This operating and capital spending catalyzed nearly \$448.8 million of additional economic activity in firms throughout the region. In addition to spending within the telecommunications industry, major effects are also seen in cable and other subscription programming; advertising and related services; and professional, scientific and technical services, as shown in the table to the right. This spending also supported almost 2,300 jobs in these and other sectors.

Employee spending

In 2010, major Connecticut cable companies employed almost 3,300 people in the state, with a combined payroll of \$247.7 million. The household spending of these employees contributed to an additional \$171.9 million in economic activity and supported more than 1,100 additional jobs in other industries throughout the region.

FIGURE 8

Top Sectors Supported by Major Cable Company Spending on Operations and Capital Investment, 2010

Telecommunications	\$74.3M
Cable and other subscription programming	\$20.6M
Advertising and related services	\$19.2M
All other miscellaneous professional, scientific and technical services	\$18.0M
Real estate establishments	\$16.2M
Architectural, engineering and related services	\$16.1M
Wholesale trade businesses	\$11.3M
Telephone apparatus manufacturing	\$10.9M
Maintenance and repair construction of non-residential structures	\$9.6M
Accounting, tax preparation, bookkeeping and payroll services	\$9.1M

Source: Data collected from major NECTA firms, calculations by UMDI; MIG, Inc., IMPLAN System

NEW ENGLAND'S MAJOR CABLE COMPANIES SUPPORT KEY INDUSTRIES

New England has a small but robust cable programming and production sector, and major cable companies across New England spent nearly \$130 million in this sector. In 2009, this sector had 4,421 jobs across the region and grew by more than 25 percent in the last five years. The vast majority of these jobs, nearly 80 percent, are based in Connecticut.

FIGURE 9

Employment in Cable and Other Subscription Programming Firms, 2005–2009

Source: United States Bureau of Labor Statistics, Quarterly Census of Employment and Wages for NAICS Industry 515210, the Cable Programming Industry

Contribution to state and local revenues

The cable sector contributes to government coffers through state and local taxes and fees. In 2010, major cable companies paid \$140.9 million in state and local taxes and fees (this includes subscriber-paid taxes), directly supporting state and local governments.

Responding to the demands of a new economy: Cable innovation in New England

Home and business uses of data are proliferating, and the demand for lightning-fast connection speeds and capacity is growing in step, spurring cable innovation. Regional speeds are some of the nation's best, invigorating business and home uses that push economic advancement. Ongoing infrastructure investments by New England's major cable companies have contributed to the region's enviable data speed capacity. Collectively, the New England states consistently rank in the top 10 for connection speeds according to Akamai Technology's quarterly *State of the Internet* report.⁶ Recent data show that on average, the United States had a measured connection speed of 4.8 mbps. Connecticut averaged 5.4 mbps, ranking 10th in the United States overall. The improved speed and capacity allow for additional innovation at work and in the home. While enabling cable's traditional entertainment market to expand with new technologies such as high-definition television, digital video recording and 3D television, cable companies are also leveraging broadband's new speeds to foster groundbreaking new services and products that launch businesses and residential consumers into the new economy.

Growing markets for cable companies

The increasing needs of residential and business customers for connectivity and customized services are leading to growth in new markets for cable companies.

Telecommuters

Cable broadband increasingly connects employers to their employees and contractors remotely. According to the United States Census Bureau,⁷ 4.0 percent of Connecticut residents work from home. Increased broadband availability, along with other business-focused cable innovations, are helping to support this wave of home offices for the self-employed and telecommuters. Select cable companies in New England are also taking advantage of their networks' speed and remote access technologies and, increasingly, are giving employees, like customer care representatives, the opportunity to work from home.

Small businesses and microbusinesses

Small businesses drive regional economies. A November 2010 survey⁸ for the United States Small Business Administration revealed that for the majority of small business respondents (54.7 percent) in the Northeast (New England with New York, New Jersey and Pennsylvania), high-speed cable is the dominant means for the provision of broadband services. In contrast to the rest of the nation, where high-speed cable connects only between a quarter and a third of small businesses, small businesses in the Northeast are highly reliant on the services of cable operators.

Further, recent work suggests that microbusinesses⁹ are essential to regional economic growth¹⁰ and, no doubt, these businesses have been highly impacted by broadband expansion. These businesses are important in Connecticut: In 2008, 17.1 percent of Connecticut workers were employed by a microbusiness. Given the general reliance of small business on cable broadband in New England, it is clear that these extra-small businesses are relying heavily on cable companies to help connect them to their customers.

Large and institutional customers

Cable companies are tailoring products and services to large business clients with industry-specific customization needs. Growing emphasis on increasing health care efficiencies has led to strong relationships in that industry. Cable is customizing private networks that connect hospitals, doctors' offices and labs with increased bandwidth and greater data speeds to meet the growing needs of its users.

Innovative products and services

Building on faster speeds and increased broadband capacity, the following are examples of new products and services provided to residential and large and small business customers.

Mobile and wireless

Consumers are demanding access to products and services on the go, and the cable sector is responding with new mobile and wireless options. Cable companies in New England are entering new product markets by adding additional services to the bundling trend, like wireless phones, as well as upgrading their established markets by providing online and portable access to their bread-and-butter digital subscription television services.

Home security

Advancing technologies have enabled cable companies to enter entirely new markets. Home security products are being tested in select New England markets by major cable companies, which include a Web portal, mobile applications, and text and e-mail alerts, and utilize both broadband and cellular technology.

VoIP

A significant share of New Englanders use Voice over Internet Protocol, or VoIP, for their residential voice service (28.1 percent), and businesses are starting to convert to this technology. The most recent Federal Communications Commission report¹¹ finds 2.6 percent of New England businesses have migrated to digital phone service from their traditional switched service, a rate slightly lower than the United States overall (3.1 percent).

Data storage services

Beyond voice and data, new technology innovations like cloud computing are enabling cable companies to provide more comprehensive and sophisticated data storage solutions for businesses, including disaster recovery, data backup, data protection, security and connectivity to accompany their growing suite of business products and services.

SUPPORTING LOCAL COMMUNITIES

Through philanthropic giving, unique local programming and targeted educational initiatives, major cable companies are helping to build stronger communities in Connecticut.

Philanthropic giving

In 2010, major Connecticut cable companies provided nearly 1,700 schools, libraries, nonprofits, government facilities and other community institutions in their service areas with donated cable and broadband services with an estimated value of more than \$2 million. Additionally, in 2010, Connecticut's major cable companies report contributions of more than \$4.2 million in cash and in-kind support to nonprofit organizations in their local communities. In a tight fiscal climate, cable companies are providing valuable support to help sustain critical community institutions.

FIGURE 10
Philanthropic Activity by Major Cable Companies in Connecticut, 2010

Cash contributions	\$0.6M
In-kind contributions	\$3.7M
Voice, video and data broadband services (estimated value)	\$2.0M
Total	\$6.3M

Source: Data collected from major NECTA firms; calculations by UMDI

Serving local communities with regional programming

Almost universally, major cable companies provide unique local content to their customers in the form of sports coverage, regional politics and public interest programming through the traditional video medium and, increasingly, enhanced online content. **Cablevision's MSG Varsity Initiative** partners with students and teachers in its Connecticut service areas to produce both professional and student-generated news content focused on high school sports, academics and activities on a dedicated television and online network. In addition, **Cablevision's News12** provides 24-hour local news coverage in its Connecticut service

areas, including updated local weather and traffic conditions. **Comcast Sports Network New England** features New England-centric comprehensive sports programming for local, regional and national events of interest, including both college and professional coverage. Both on TV and online, Comcast has rolled out this regional sports-focused programming in 11 areas of the country, including New England. Also New England-wide, **Comcast's New England Cable News (NECN)** is the largest 24-hour regional news network in the country and maintains a local news bureau in Hartford, Connecticut. **Cox Sports** provides its Connecticut service areas with coverage and original programming on the local and regional sports scene, including live coverage of University of Connecticut sports.

Connecting and engaging 21st-century learners and leaders

Connecticut's major cable companies have established numerous programs to improve students' technological literacy and to prepare them to be future leaders and innovators in an information-based economy. Over the next year, **Cablevision's Power to Learn** initiative will be raising awareness about cyberbullying. Partnering with schools and Boys & Girls Clubs, the campaign includes public service announcements, town hall meetings on local television channels and events in schools to educate teachers, students and parents on identifying, preventing and responding to cyberbullying. **Charter's** national **Get Hooked on Education** initiative provides a resource for families on media literacy. Additionally, in its New England service areas, Charter sponsored events to provide the **DIGIKIDS® Child ID Program**, providing parents and authorities with the digital tools needed to respond quickly to a missing child. **Comcast** supports **Bigs and Littles**, a program where Comcast employees serve as mentors to young children through Big Brothers Big Sisters. **Cox Charities New England** has focused its community grant program on outcomes-based academic after-school programming for middle-schoolers. Past grantees have included the Meriden Boys & Girls Club, the Southington YMCA, Village for Children and Families, the Manchester Police Athletic League and Enfield Resources for Children, among others.

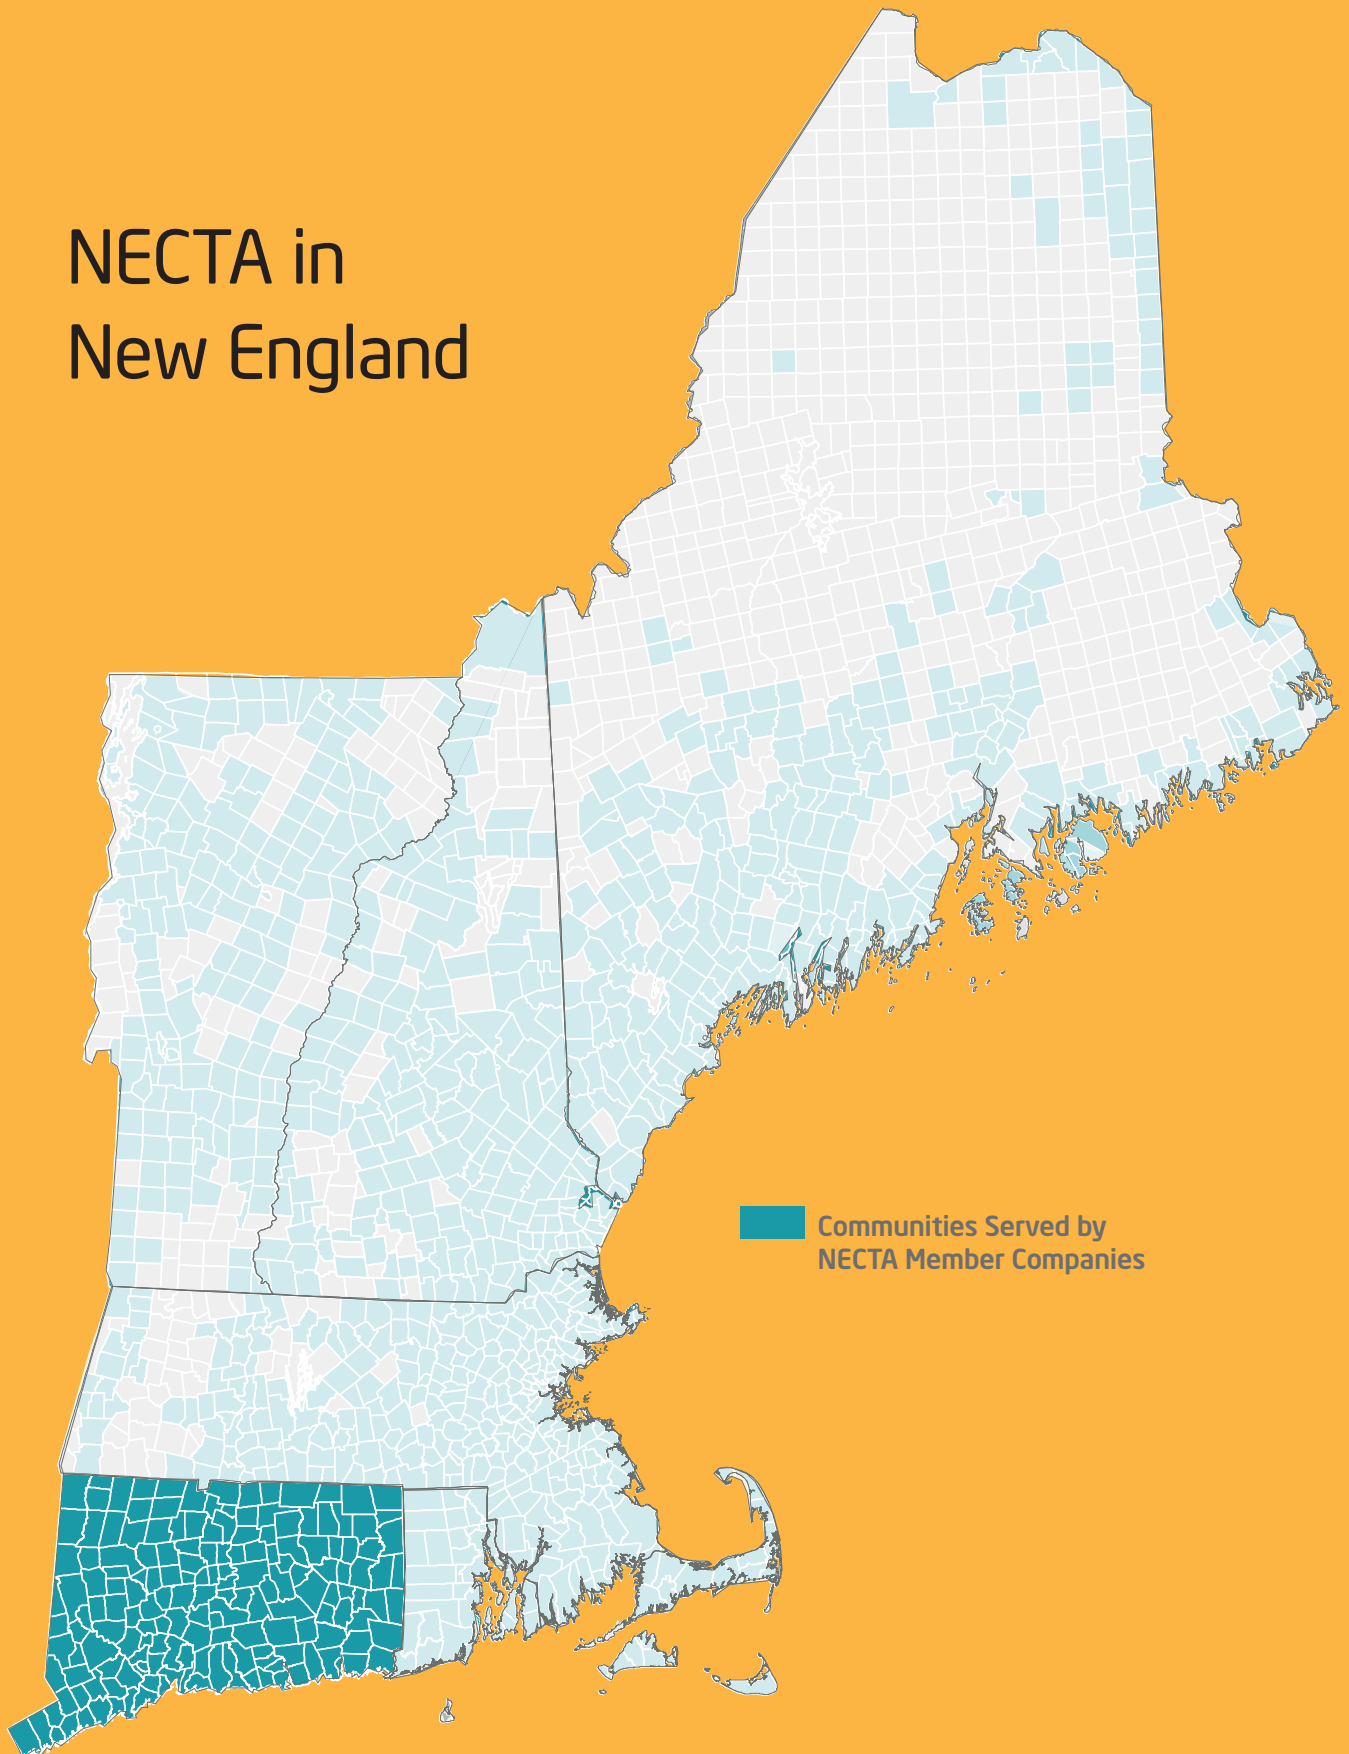

CONCLUSION

Connecticut's cable companies support the regional economy in many ways. They are significant employers, and through their day-to-day operations, their massive capital investment and the spending of their thousands of employees, these companies contribute \$1.47 billion to Connecticut's economy. Their diverse service offerings are expanding to meet the demands of hundreds of thousands of their residential and business customers. Major cable companies are leaders in building the region's broadband infrastructure, and their investments support IT and other industries across the state. No less important, they are making further contributions to the communities they are serving through their philanthropic initiatives and by donating services to more than a thousand community institutions. As data demands change and increase, cable companies will continue to dynamically adapt, providing cutting-edge technology to residences and businesses and providing the connectivity to support and grow the region's economy.

ENDNOTES

- ¹ For the purposes of this study, major cable companies are defined as those NECTA cable companies that provided data for this study, and not necessarily all cable companies present in a region. Therefore, analysis of the employment and economic contributions of major cable companies to the region represents a conservative estimate. In Connecticut, these companies include Cablevision, Charter Communications, Comcast and Cox Communications.
